| Education | | | |
| Program | Institution | CGPA / % | Completion |
| Dual Degree (M.Tech. in Data Science, | Indian Institute of Technology, Madras | 9.08 / 10 | 2023 |
| B.Tech. in Mechanical Engineering) | | | |
| XII (CBSE) | OS DAV Public School, Kaithal | 93% | 2018 |
| X (CBSE) | OS DAV Public School, Kaithal | 10 / 10 | 2016 |
| Relevant Courses | | | |
| Artificial Intelligence | Deep Learning Pattern Recognition & Machine Learning ML for Engineering & Science Applications | | Science Applications |
| Computer Science | GPU Programming Programming and Data Structures Database Management System | | |
| Mathematics | Probability, Statistics & Stochastic Processes Differential Equations Calculus Series & Matrices | | |
| Data Science | Math Foundations of Data Science Data Analytics Lab | Introduction to Data Ana | alytics Big Data Lab |
| Tools: PyTorch, Triton, Transformers, Datasets, Accelerate, JAX, DeepSpeed, Wandb, Streamlit Languages: Python, Rust, C++, MATLAB, LaTeX | | | |
| Achievements and Honors | | | |
| Google Developer Expert (2022) | Recognized as Youngest Google Developer Expert in JAX worldwide for contributions to scalable ML. | | |
| TensorFlow (Google) Recognition | Featured in official TensorFlow blog post for outstanding work during Google Summer of Code 2021. | | |
| HuggingFace Fellowship | Awarded \$3,000 fellowship & featured in HuggingFace's newsletter for contributions to Transformers. | | |
| Open-Source Impact | Earned 200+ stars on GitHub, widely recognized by open-source community for contributions to Al. | | |
| Inter IIT Tech Meet (2021) | Secured 'Gold' in 9th Inter IIT Tech Meet organised by IIT Guwahati, representing IIT Madras team. | | |
| JEE Advanced (2018) | Secured All India Rank (AIR) of 3331 with a percentile score of 98.89% in the JEE Advanced 2018 exam. | | |
| Professional Experience | | | |
| Al Pre-training Lead, Unbox Al - CA, USA (Remote) | | | June'21 - Present |
| • Handpicked by Prof. Gunnar Carlsson (Stanford) & Mr. Rickard Gabrielsson (Stanford & MIT) to help lead AI efforts at Unbox AI, an emerging | | | nbox AI, an emerging |

- leader in building advanced foundation models like BehaviorGPT that anticipate user needs, serving major retail clients, including Klarna.
- Helped scale company 5x, managing over \$1M in compute. Promoted to partner in 2 years, played a key role in securing Klarna as a client.
- Led a cross-functional team to build a scalable codebase for large models and worked with Stanford PhDs to bring research into production.
- Scaled BehaviorGPT pre-training to billions of parameters & 1T tokens on 96 H100s, studying emergent properties as model size increased. • Iteratively optimized training data and carefully refined learning objectives to align model pre-training with desired production use cases.
- BehaviorGPT-powered search & recommendations receive 70M+ visits monthly and boosts sales by 20% for leading e-commerce company.
- Implemented Triton kernels, improving memory efficiency and achieving linear scaling with nodes, resulting in a 5x speedup over PyTorch.

Open-Source Development

Google Summer of Code, TensorFlow

May'21 - Aug'21

- Selected for the highly competitive Google Summer of Code, a global program that funds top students to work on open-source projects.
- Implemented Meta's Wav2Vec2 and built a library for training speech-to-text models on TPUs, earning over 89 stars & 29 forks on GitHub.
- Trained the model on 300 GB of LibriSpeech data using TPU v3-8 and advanced data streaming, achieving a 3% word error rate on test set.

HuggingFace (Transformers, Accelerate, Hub)

Feb'21 - June'21

- Selected by HuggingFace, a \$4.5B AI startup, to contribute BigBird to its widely-used Transformers library, impacting researchers globally.
- Implemented BigBird model in PyTorch and JAX, including training scripts, quickly adopted by over 200,000 users within months of release.
- Integrated Microsoft's DeepSpeed with HuggingFace Accelerate, supporting distributed training strategies such as ZeRO-3 & ZeRO-Offload.

Extracurricular Activities

Google Summer of Code'2022 Mentor

May'22 - Aug'22

• Selected by Google to mentor for Google Summer of Code 2022 project titled 'Developing NLP Examples Using Hugging Face Transformers'.

Transformer models for multilingual machine translation, offering strategies for training adapters.

• Successfully guided participants in implementing, optimizing and training state-of-the-art NLP models for impactful real-world applications.

Strategist, Analytics Club (CFI)

Machine Translation

Mar'20 - Mar'21

- Contributed to the AI community at IIT Madras by mentoring five projects and guiding over 15 students in developing innovative solutions.
- Led a team of over 8 members, attracting more than 300 participants from various engineering disciplines for live sessions and workshops.
